

## Solar Collector Labeling Agreement

Version 20110826

This is an agreement between the Florida Solar Energy Center (FSEC) and a manufacturer (herein called the seller) for identifying a solar collector as meeting the requirements of Test Methods and Minimum Standards for Certifying Solar Collectors (FSEC Standard 102-10).

FSEC agrees to:

1. Furnish the seller with one copy of the approved label information.
2. Authorize the seller to use the FSEC name on the label of each certified model.

The Seller agrees to:

1. Represent a collector as certified only when it is manufactured of the same materials and specifications as the collector that was originally certified.
2. Permanently affix the approved label to all production units of the certified model.
3. Make copies of the FSEC label information available to the consumer upon request.
4. Notify FSEC of changes in collector materials or construction and accept FSEC's judgment relative to whether these changes constitute a new model requiring retesting.
5. Permit FSEC to select, at any time, a certified collector offered for sale or on display and retest the collector to demonstrate its compliance with specifications and performance. Payment of fees for retesting will be in accordance with the provisions of paragraph 5.1.8 of the Operation of the Collector Certification Program (FSEC Standard 101-10).

I have read, understood, and will abide by the above Labeling Agreement.
